## **Duke** Clinical Research Institute **Quick Reference Card**

## **Cisco AnyConnect**

Installing on a Non-DCRI OS X Computer

### Overview

If you need to access DCRI/Duke network resources, but are remote from a DCRI facility, the recommended remote access option is **AnyConnect** from Cisco Systems, also known as *Duke Health VPN* or just *VPN*. This quick reference card (QRC) summarizes how to install AnyConnect on an Apple desktop or MacBook running OS X that you own.

### About AnyConnect

With this VPN (Virtual Private Network) application, you can use your own OS X computer to access from a remote location:

- Resources on the DCRI Intranet, protected web applications and websites, and secure SharePoint sites.
- Folders and files (you have permission to access) on shared network drives.
- (*if applicable*) A Virtual Machine (VM) or a DCRI-issued Windows computer running at your desk at a DCRI facility.

### **Requirements**

To access this service, you have:

- OS X version 10.10 (Yosemite) or later.
- A high-speed Internet connection (wired or wireless).
- A valid NetID and working password.
- Multi-Factor Authentication (MFA) enabled. For more information, see the MFA QRC at <u>http://library.dcri.duke.edu/ dtmi/IT/Remote/Q/MFA.pdf</u>.

## Installing the Client Software

The following is specific to OS X 10.12 (Sierra) using Safari 10. Adjust steps, as needed, if you use different releases.

**Important!** The installer first attempts to load the client software automatically. It is *normal* for this automatic process to fail and you will proceed with a manual installation.

1 Click this link (or point your browser to): connect.dcri.org

The DCRIconnect portal page appears.

2 Click the Cisco AnyConnect icon, text, or link.

#### The Cisco SSL VPN Service page appears.

uluiju cisco	SSL VPN Service
	Login
	Please enter your username and password.
	USERNAME: xyz99
	PASSWORD: •••••• 2nd Password •••••
	Login

- **3** Enter your NetID as **Username**, and then enter your network **Password**.
- **4** In the **Security Key** field, enter the method you want to use for Multi-Factor Authorization (MFA):

Enter into this field a **Duo Mobile** app code (by tapping the app's key icon), YubiKey code, or an unused SMS (Short Message Service) code. Otherwise, you are expected to enter one of the following *words*:

- Enter **phone** to have the system call the top phone you listed on the Duke Office of Information Technology (OIT) MFA website. You can enter **phone2** or **phone3** to have the system call the second or third phone on your list.
- Enter **push** to have the system push notification to the Duo Mobile app on the top smartphone or tablet you listed in the OIT website. You can enter **push2** or **push3** to send to the second or third device on your list.
- Enter **sms** to have the system send you a batch of passcodes. Enter one of them into this field to authenticate this session.
- 5 Click Login and complete your MFA verification.

When the **AnyConnect Secure Mobility Client** window appears, the system tries to automatically install Cisco AnyConnect for you. It is *normal* for this automatic installation to fail.

6 When the following appears, click the Mac OS X link.

## J Duke Clinical Research Institute Quick Reference Card

# **Cisco AnyConnect**

## Installing on a Non-DCRI OS X Computer

The AnyConnect image file loads into your computer's Downloads folder.

7 In your **Downloads** folder, double-click the .dmg disk image file.

	🚺 Downloads ::: 📃 📖 📖 🚟 🗸 🌴 < 🕆 📿	
Favorites	Name	Size
All My Files	anyconnect-macosweb-deploy-k9.dmg	4.9 MB
AirDrop		

The AnyConnect VPN dialog opens containing a vpn.pkg package file.

- 8 Double-click the **vpn.pkg** file.
- If a message appears, alerting you that the certificate for the 9 application has expired, click Continue.

A multi-page Install AnyConnect Secure Mobility Client window opens to the Introduction page.

	Install AnyConnect Secure Mobility Client	
	Welcome to the AnyConnect Secure Mobility Client Installer	
Introduction	You will be guided through the steps necessary to install this software.	
License		
<ul> <li>Destination Select</li> </ul>		

#### **10** Click **Continue**.

The Software License page appears.

**11** Scroll to read the license, then click **Continue**.

A confirmation message drops down.

#### 12 Click Agree.

The drop-down message rolls up as the Installation Type page appears.

•••	Install AnyConnect Secure Mobility Client	
	Standard Install on "Macintosh HD"	
<ul> <li>Introduction</li> <li>License</li> <li>Destination Select</li> <li>Installation Type</li> </ul>	This will take 12.7 MB of space on your computer. Click Install to perform a standard installation of this software on the disk "Macintosh HD".	

### 13 Click Install.

A message appears, prompting you to enter administrator log on credentials

14 Enter the computer's administrator Username and Password, and then click Install Software.

The Installation page appears, showing the progress of the software installation.

Wait for the Summary		Install AnyConnect Secure Mobility Client	
page to appear. <b>15</b> Click <b>Close</b> .	<ul> <li>Introduction</li> <li>License</li> <li>Destination Select</li> <li>Installation Type</li> <li>Installation</li> </ul>	The installation was completed successfully.	
<ul><li>16 If prompted, you can</li><li>Move to Trash the</li></ul>	• Summary	The software was installed.	

17 Close all other windows opened during this installation.

Tip: If you will use the application often, consider placing it on your Dock or creating an Alias to it where you can find the application quickly.

## Getting Help

installer file.
